FOCUS CORPORATION SELECTED AS OFFICIAL SURVEYOR FOR ALBERTA CARBON TRUNK LINE

Focus announces their involvement in the Alberta Carbon Trunk Line

CALGARY, AB – (AUGUST 30, 2011) Focus Corporation (Focus) has been selected to provide professional survey services for the Alberta Carbon Trunk Line Project (ACTL). Focus is an established multi-disciplinary consulting firm that provides an extensive range of services to clients involved in oil and gas, oil sands, infrastructure, land development and environmental projects.

The ACTL is Alberta's first, substantial, commercial carbon capture and storage (CSS) project that will focus on reducing environmental impacts, as well as being economically beneficial. Currently, Focus is commissioned to complete preliminary surveys and plan production for regulatory approvals and licensing, stakeholder and land owner consents. Their partnership with Enhance Energy Inc. (Enhance) has allowed Focus to expand their workforce throughout the duration of the project as well as showcase themselves as one of the largest Geomatics firms in Canada, while re-enforcing their position in the marketplace.

"Focus is proud to be a key partner in this important project," said Ron Hall, Executive Vice President of Focus Corporation. "We are committed to working alongside Enhance to ensure positive community relations and successful project execution."

"Focus' commitment to fostering community relations while providing unparalleled products and services is exactly the type of company Enhance would like to align ourselves with," said Blair Eddy, Vice President Operations, Enhance Energy Inc.

The ACTL will position Alberta to become a world leader in CO₂ recovery and allow significant advancements in reducing Canada's carbon footprint.

About Focus:

Focus Corporation is a multi-disciplinary consulting firm that provides a wide range of geomatics, oil and gas facilities engineering, transportation, environment and land development/municipal services throughout Western Canada. At Focus, we partner with clients to help optimize their assets, improve their competitive position and increase their long-term success. To that end, we use and develop leading edge technology, follow the best-practices maintained by each of our professions and nurture our relationships with our clients – by providing great service and honest, timely and useful communications.

About the Alberta Carbon Trunk Line (ACTL)

The ACTL will be capable of gathering CO₂ from several sources in the Alberta's Industrial Heartland and transporting the CO₂ to existing mature oil fields throughout South-Central Alberta. These oilfields will see

FOCUS

significant increases in production as CO₂ is permanently stored in the reservoir. The capture and permanent storage of CO₂ will result in significant reductions in emissions of greenhouse gases in Alberta. The initial supply of CO₂ will come from North West Upgrading Inc. and Agrium Inc.
